

SOJ Anesthesiology and Pain Management

Thanking Editors and Peer Reviewers

Two boards form the strength of the Journal; one is the Editorial board, whose decision significantly adds to the quality of the manuscript in turn to the Journal. The other is the equally important Reviewer board, which consists of the reviewers who form the base for the review process, whose suggestions to the manuscripts are valuable. These reviewers though not an integral part of a journal, show their scientific responsibility by reviewing the manuscripts whenever asked for.

The whole process of improving the standards of the manuscript to SOJ Anesthesiology & Pain Management is a result of hard work of both the editors and reviewers. Symbiosis has around a total of 1000 editors and reviewers and is still growing day by day.

We are honored to utilize this opportunity to thank all the reviewers and editorial members who are dedicated to their work and generously volunteered their time in reviewing the manuscripts obtained to SOJ Anesthesiology & Pain Management.

This Editorial is to appreciate and highlight all the reviewers and Editors for their quality reviews. It is our great pleasure to recognize the following personalities for their work to SOJ Anesthesiology & Pain Management:

Lingqun Hu

Northwestern University, USA

Kenneth C Jackson
