

Special Issue on  
**“Pediatric Anesthesia”**

**Aims and Scope**

[SOJ Anesthesiology & Pain Management](#) is a peer reviewed open access journal, exclusively designed for the international Scientific community that addresses ongoing research on Anesthesia & Pain management, which aims to provide a unique platform for publishing high quality research work. The journal aims to frame up an outstanding special issue on Pediatric Anesthesia.

It is the Anesthesiology dealing with the new born, infants, and kids up to the age of 12 years of age. Infants should preferably be sedated in the mother's or nurse arms. Utmost care should be taken in anesthetizing children to make the procedure as simple as possible. Mental suggestion from the surgeon here plays a huge role, along with tenderness in voice and movement. Patients who are undergoing anesthesia of any type are not allowed to eat or drink beforehand.

The objective of the special issue is to integrate the growing international community of researchers working on the topics like Pediatric Sedation, Pediatric Anesthetic Practice, Anesthesia-related Neurotoxicity, Pain in Children and Physiology of Anesthesia in Children.
