

Journal of Clinical Trials in Cardiology

Special Issue on “Atherosclerosis & CVD Risk”

Aims and Scope

[Journal of Clinical Trials in Cardiology](#) is a peer reviewed open access journal, exclusively designed for the international Scientific community that addresses ongoing research on Clinical Trials in Cardiology, which aims to provide a unique platform for publishing high quality research work. The journal aims to frame up an outstanding special issue on Atherosclerosis & CVD risk.

Atherosclerosis and cardiovascular disease take a huge toll on our society. Atherosclerosis is a definite form of arteriosclerosis in which an artery wall thickens as a result of invasion and accumulation of white blood cells. Atherosclerosis is therefore a syndrome affecting arterial blood vessels due to a chronic inflammatory response of WBCs in the arteries.

The objective of the special issue is to integrate the growing international community of researchers working on the topics like Aortic valve Calcification, Intima-Media Thickness, Aortic Stenosis, Arteriosclerosis, and Percutaneous Coronary Intervention.
