### **Aims and Scope**

[Journal of Clinical Trials in Cardiology](#) is a peer reviewed open access journal, exclusively designed for the international Scientific community that addresses ongoing research on Clinical Trials in Cardiology, which aims to provide a unique platform for publishing high quality research work. The journal aims to frame up an outstanding special issue on Cardiovascular Imaging.

Cardiovascular Imaging uses the most sophisticated technology offered to capture images of the heart. These different techniques allow physician to make accurate diagnoses and determine the best treatment for each patient. Obtaining and interpreting images of the heart are critical to the successful management of any cardiac disorder.

The objective of the special issue is to integrate the growing international community of researchers working on the topics like Coronary Catheterization, Echocardiogram, Intravascular Ultrasound, Positron Emission Tomography and Computed Tomography Angiography.
