

Journal of Clinical Trials in Cardiology

Special Issue on “Stroke and its Consequences”

Aims and Scope

[Journal of Clinical Trials in Cardiology](#) is a peer reviewed open access journal, exclusively designed for the international Scientific community that addresses ongoing research on Clinical Trials in Cardiology, which aims to provide a unique platform for publishing high quality research work. The journal aims to frame up an outstanding special issue on Stroke and its Consequences.

A stroke is the loss of brain function due to a interruption in the blood delivery to the head. This disorder is due to either ischemia or internal bleeding. As a result, the affected area of the brain cannot function usually, which might result in an incapability to move one or more limbs on one side of the body, malfunction to understand or create speech, or a vision impairment of one side of the visual field.

The objective of the special issue is to integrate the growing international community of researchers working on the topics like Paralysis, Vision Problems, Memory loss, Ataxia, and Headache.
