

Clinical Research in Dermatology: Open Access

Special Issue on

“Melanoma: Current Perspectives”

[Clinical Research in Dermatology: Open Access](#) (CRDOA) is an international Open Access Publication dealing with the skin, its diseases and their treatments. CRDOA provides a medium for projecting interesting and intriguing research in dermatology. The articles feature studies like dermato clinical investigations, cosmetology, skin infections & diseases, skin cancer, skin grafts, allergic reactions and immunological responses.

Melanoma is a type of skin cancer that occurs from melanocytes. It is caused by DNA damage due to the exposure to UV light. Many ongoing researches are on its way for the prevention and early detection for melanoma. Targeted therapy for MAP kinase and immunotherapy are under clinical trials. Melanoma peptide vaccines are assessed in clinical trial for patients with localized and advanced melanoma. These therapies are still under experimental study.

Our Journal of Clinical Research in Dermatology invites papers from throughout the global community of researchers covering many topics but are not limited to: Immunotherapy, questionnaire survey, nanotechnology in photodynamic therapy, early detection of melanoma, melanocytic nevi Optimal management, Molecular diagnostics in melanoma which paves a way for publishing outcomes of recent research trends and investigations in Melanoma: Current Perspectives.

As we are a step ahead to bring the *Current research on Melanoma: Current Perspectives* exploration to you and every other in an easy accessible way by your participation and cooperation.

Submissions

All kinds of papers are invited. Please refer [Author guidelines](#) before submission. Author benefits for these submissions will be found at [special issue page](#).

Use the online [Manuscript Tracking System](#) to submit your papers or e-mail it to dermatology@symbiosisonline.org

Submissions are open from January 26, 2015
