

Special Issue on
“Cytokines: Immunological Playmakers”

Aims and Scope

[SOJ Immunology](#) is a peer reviewed open access journal, exclusively designed for the international Scientific community that addresses ongoing research on Immunology, which aims to provide a unique platform for publishing high quality research work. The journal provides current research information in basic and advanced aspects of the immune system, and host defense mechanisms.

A small protein released by cells which has a specific effect on the communication between cells, the cytokines consists of interleukins, lymphokines and cell signaling molecules, like tumor necrosis factor and the interferon's, which generate inflammation and respond to infections.

The objective of the special issue is to integrate the growing international community of researchers working on the topics like Types of Cytokines, Cytokine Receptors, Cytokine Production, and Anti-Inflammatory Cytokines.
