

Special Issue on “Trypanosomatids Biology”

Aims and Scope

[SOJ Microbiology & Infectious Diseases](#) is an open access peer reviewed journal, solely designed for the worldwide scientific community that addresses current research on microbiology, which aims to provide an exclusive platform for publishing worthy research work. The journal aims to frame up an outstanding special issue on **Trypanosomatids Biology**.

Trypanosomatids Biology special issue from SOJ Microbiology and Infectious Diseases provides novel insights into pathogenesis, intracellular traffic, host immunity, drug discovery, control, vaccine updates, epidemiology and structural aspects of Leishmania, *Trypanosoma cruzi* and *Trypanosoma brucei*, the most important trypanosomatids that cause human infection.

The issue offers opportunities to update the current scenario and to promote debates on the subject. We understand that achieving these objectives, the issue may contribute to the orchestration of future researches to better comprehend the biology of these important pathogens.

Submissions

Authors are invited to submit articles which address the progress and current standing of Trypanosomatids Biology. Please refer [Author guidelines](#) before submission.

Author benefits for these submissions will be found at [Special issue page](#). Use the Online [Manuscript Tracking System](#) to submit your papers or e-mail it to microbiology@symbiosisonline.org

Submissions are open from February 20, 2016

Editorial Board Members

Claudio Vieira da Silva

Federal University of Uberlandia, Brazil

Kenneth M. Peterson

Louisiana State University Health Sciences
Center, USA

Jeanette Jones

University of Alabama, USA

Hong Zhou Z

California Nano Systems Institute, USA
