

Nanoscience & Technology: Open Access

Special Issue on “Nanotoxicology”

Aims and Scope

[Nanoscience & Technology: open access](#) is a peer reviewed journal, solely designed for the worldwide scientific community that addresses current research on nanotechnology, which aims to provide an exclusive platform for publishing worthy research work. The journal aims to frame up an outstanding special issue on Applications of Nanomaterials in Biology and Medicine.

Nanotoxicology is a study of bionanoscience, it deals with the study and application of toxicity of nanomaterials. Nanotoxicological research is studied to determine whether and to what extent these properties may pose a threat to the atmosphere and to living beings. The goal of this special issue was to compile the most recent views and work of leading scientists in nanotoxicology by a series of timely reviews followed by original research articles.

NSTOA invites papers from entire the worldwide community of scientists covering many topics like but not limited to toxicity of nanomaterials both on human models and environment, Complications, Nanotoxicology *in vitro* and *in vivo*, safety assessment, etc. which paves a way for publishing outcomes of recent research in Nanoscience & Technology.

As, we are in a step ahead to bring the Current research on **Nanotoxicology** exploration to you and every other in an easy accessible way by your participation and cooperation.

Submissions

Authors are invited to submit articles which address the progress and current standing of Nanotoxicology. Please refer [Author guidelines](#) before submission.

Author benefits for these submissions will be found at [Special issue page](#). Manuscript should be submitted [Here](#) or e-mail it to nano@symbiosisonline.org

Nanoscience & Technology: Open Access

Submissions are open from October 01, 2015

Editorial Board Members

Seyed Ali Johari

University of Kurdistan, Iran

Alice C Parker

University of Southern California, USA

Paul S. Ho

Catholic University, USA

Dimitra NS. Cullum

U.S. Army Research Laboratory, USA

Editorial Contact

Ellen Spencer

Managing Editor
