

Nanoscience & Technology: Open Access

Special Issue on “Nanosensors and Optical Sensors”

Aims and Scope

[Nanoscience & Technology: open access](#) is a peer reviewed journal, exclusively designed for the worldwide scientific community that addresses current research on nanotechnology, which aims to provide a special platform for publishing worthy research work. The journal aims to frame up an outstanding special issue on Nanosensors and Optical Sensors.

Nanosensors are chemical, biological, or surgical sensory points used to transmit information about nanoparticles to the macroscopic world, mainly includes various medicinal purposes and as gateways to building additional nanoproducts, for example, computer chips that work at the nanoscale and nanorobots. Presently, there are a number of ways proposed to make nanosensors, including top-down lithography, bottom-up assembly, and molecular self-assembly.

NSTOA invites papers from entire the worldwide community of scientists covering many topics on Nanosensors and Optical Sensors, which paves a way for publishing outcomes of recent research in nanotechnology.

As, we are in a step ahead to bring the current research on Nanosensors and Optical Sensors exploration to you and every other in an easy accessible way by your participation and cooperation.

Submissions

Authors are invited to submit articles which address the progress and current standing of Nanosensors and Optical Sensors. Please refer [Author guidelines](#) before submission.

Author benefits for these submissions will be found at [Special issue page](#). Manuscript should be submitted [Here](#) or e-mail it to nano@symbiosisonline.org

Nanoscience & Technology: Open Access

Submissions are open from October 01, 2015

Editorial Board Members

Seyed Ali Johari
University of Kurdistan, Iran

Alice C Parker
University of Southern California, USA

Paul S. Ho
Catholic University, USA

Dimitra NS. Cullum
U.S. Army Research Laboratory, USA

Editorial Contact

Ellen Spencer
Managing Editor
