

“School and Community-Based Nutritional Interventions”

Aims and Scope

[Journal of Nutritional Health & Food Science](#) is a peer reviewed open access journal, exclusively designed for the international Scientific community that addresses ongoing research on Nutritional Health & Food Science, which aims to provide a unique platform for publishing high quality research work. The journal aims to frame up an outstanding special issue on School and Community-Based Nutritional Interventions.

Health interventions applied on a community-wide base have come into rising use in public health and epidemiologic research over the past number of decades. The emergence of community health intervention trials represents a shift in health research from investigations that focus primarily on the individual to those that focus on larger community groups. Improving the health and nutrition of school children through school-based programs is not a new concept. It is changing as new policies and partnerships are being formulated to help and make sure that programs focus on promoting health and improving the educational outcomes of children, as well as being communally progressive and particularly targeting the poor, girls, and other deprived children.

The objective of the special issue is to integrate the growing international community of researchers working on the topics like Treatment of Pediatric Overweight and Obesity, Cardiac Kinder, Improved Dietary Habits and Increased Fruit & Vegetable Consumption.

Topics

This special issue deals with the topics of the following but not limited to

Treatment of Pediatric Overweight and Obesity

Cardiac Kinder

Improved Dietary Habits

Increased Fruit & Vegetable Consumption

Reduced Sweetened Beverage Consumption

Increase Access to Healthy Food Options

Create Opportunities for Active Living

Promote Healthy Eating

Provide Physical Activity Information & Education
Reduce Access to Unhealthy Foods
School Nutrition Multi-Intervention Programs
Integrated Nutrition Project

Submissions

All kinds of papers are invited. Please refer [Author guidelines](#) before submission. Author benefits for these submissions will be found at [special issue page](#).

Use the online [Manuscript Tracking System](#) to submit your papers or e-mail to nutrifood@symbiosisonline.org

Submissions are open from January 26, 2015
