SOJ Surgery

Special Issue on

“Robotic and Computer Assisted Surgery: Advances & Advantages”

SOJ Surgery is an Open Access Journal that illustrates major contributions to the progression of surgical science and practice. The journal also features articles on the latest surgical techniques and aims to publish Scholarly Articles on advanced research in surgery and its allied fields.

Over the past decades with the acceptance of robotics in the medical field (applications) robotics and computer-assisted surgery aided advantages to overcome limitations of minimal invasive surgery, unmanned, remote surgery and conventional laparoscopic restriction elevated. These Surgical robotics when used appropriately they paves a way of advantages-precision, miniaturization, small incisions; decreased blood loss, less pain and quick healing time.

The special issue entitled **Robotic and Computer Assisted Surgery: Advances & Advantages** outcomes converge wide range of topics but are not limited to: Telesurgery, Visual Magnification, 3-D Vision, Motion Scaling, Image Brightness, Ergonomics, Diagnostic Sensing, Tactile sensing, Human Robot Interface, Endowrist Technology, Gas Insufflation, Computer-Enhanced motion control.

As we are in a step ahead to bring-out advancements in **Robotic and Computer Assisted Surgery: Advances & Advantages** exploration to you, every other in an easy accessible way by your participation and co-operation.

Submissions

All kinds of papers are invited. Please refer [Author guidelines](#) before submission. Author benefits for these submissions will be found at [special issue page](#).

Use the online [Manuscript Tracking System](#) to submit your papers or e-mail it to surgery@symbiosisonline.org

Submissions are open from January 26, 2015

Editorial Board Members

Evan S Ong
University of Arizona, USA

Luis Ulloa
Rutgers University, USA

Simon Siu-Man NG
Chinese University of Hong Kong, China

Dale Han
Yale University School of Medicine, USA
