Special Issue on “Bovine Mastitis”

Aims and Scope

[SOJ Veterinary Sciences](#) is a peer reviewed journal, solely designed for the worldwide scientific community that addresses current research on Veterinary Science, which aims to provide an exclusive platform for publishing worthy research work. The journal aims to frame up an outstanding special issue on Bovine Mastitis.

Bovine Mastitis means inflammation of the mammary gland and udder tissue. It is a major endemic disease of farm animals. It frequently occurs as an immune response to bacterial invasion of the teat canal by different bacterial species present on the farm, and can also occur as a consequence of chemical, mechanical, or thermal injury to the udder. Milk-secreting tissues and various ducts throughout the udder can be injured by bacterial toxins and sometimes permanent damage to the udder occurs.

SOJ Veterinary Sciences invites papers from entire the worldwide community of scientists covering many topics like but not limited to types of mastitis, causes, transmission, effects of mastitis, symptoms, control, prevention, etc. which paves a way for publishing outcomes of recent research and investigations in Veterinary Sciences.

As, we are in a step ahead to bring the current research on *Bovine Mastitis* exploration to you and every other in an easy accessible way by your participation and cooperation.

Submissions

Authors are invited to submit articles which address the progress and current standing of Bovine Mastitis. Please refer [Author guidelines](#) before submission.

Author benefits for these submissions will be found at [Special issue page](#). Use the Online [Manuscript Tracking System](#) to submit your papers or e-mail it to veterinary@symbiosisonline.org

SOJ | Veterinary Sciences | Open Access

Submissions are open from October 01, 2015

Editorial Board Members

Susan M. Prattis
